Report dated the 10th September 1933 from the Assistant Surgeon, Sringeri to the Senior Surgeon Mysore about the condition of health of His Holiness the Senior Jagadguru.

- - - - - - -

I am glad to inform you that His Holiness the Senior Jagadguru is improving. Since 7-9-33 he has been getting fairly long lucid intervals. Instead of being violent, as he was all these days, he will be in a stuporose condition for the greater part of the day. He performs his ablutions mechanically after being goaded. He is not altogether free from hallucinations and delusions.

Probably within a week he may be restored to his normal condition.

Copy of letter dated 24-9-1933, from the Sub Assistant Surgeon, Sringeri.

---

During the early part of the last week, His Holiness was perfectly calm and sane for a couple of days. According to his own desire Santonin was administered, as a result of which he passed two worms.

He did not like the idea of taking Medinal. For three days, he began to throw away the food containing the Medinal. As a result of it, he lost his sleep. For a couple of days he was melancolic. Since day before yesterday, he is a little noisy. He takes his food occasionally.

For further developments, I shall submit my report next week.
